JOSEPH F. DILIBERTO, Editor

W. BRYCE SMITH

and

EDMOND VANDEN BOSCHE

Business Managers

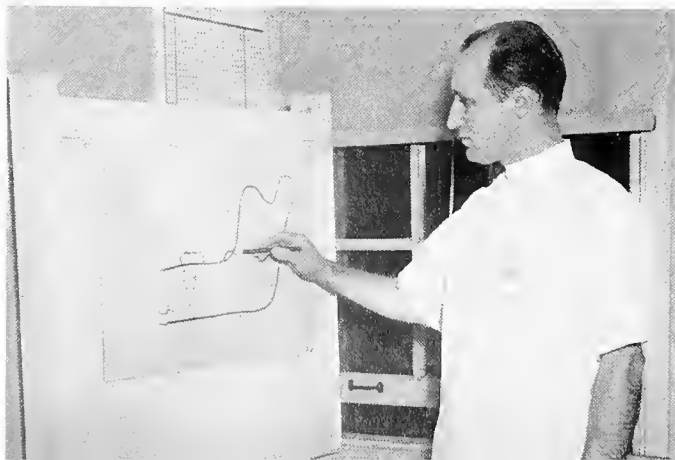

Published by the one hundred and seventh student body of the Baltimore College of Dental Surgery, Dental School, University of Maryland, Baltimore, Maryland

Dedication

TO

DR. VERNON D. KAUFMAN

TO THAT air of imperturbable composure which he wears at all times, in public and private, stemming from the inner relaxation of a completely successful teacher; to that certain ascendancy which he gains in many media of expression; to his progressiveness, which is constantly imbued with a spirit of constructive discontent; to the natural projection of his own amiable personality; to his acute horror of pretension; to that mask of languid insouciance; to his tone of voice, which imparts a simple dignity and depth of feeling; to the submergence of his very considerable intellectual endowments beneath a welter of athletic enthusiasms; to his exacting critique of material with which he deals; to his prime professional asset: the desire to teach oral surgery; and, lastly, to his supreme nonchalance as he wields a facile instrument, imparting much instruction and inspiration.

"I did not think . . . I Investigated !"

— was Röntgen's reply when asked: What did you think when you observed the luminescent effect upon the barium-platino-cyanide screen which lay on the bench?

Chronology of the X-Ray

- 1650 Otto Von Guericke invented the first air pump, later used to produce a vacuum in a Crookes' Tube.
- 1831 Michael Faraday discovered the process of electromagnetic induction by the relative motion of a magnet and a conducting wire. Without the application of this profoundly important principle to the induction coil and high-voltage electric currents, the present use of X-rays would be impossible.
- 1831-1856 Period of transition in early design of static machines, induction coils and transformers for producing high voltage.
- 1837 Michael Faraday experimented with rarefied gases producing luminous effects created by electric discharges through these media.
- 1851 Ruhmkorff produced the first induction coil, later used for energizing the X-ray tube.
- 1857 Heinrich Geissler, a German scientist of the City of Bonn, constructed the first vacuum tube and noticed that an electrical discharge passed through a vacuum tube produced a "glowing." This was termed "fluorescence."
- 1865 Herman Sprengel invented the mercury air pump the use of which resulted in the production of high rarefactions with comparative rapidity.
- 1874 Original Crookes' Tube demonstrated by Sir William Crookes.
- 1875 Sir William Crookes, an eminent English scientist, exhausted tubes to approximately one-millionth of an atmosphere pressure, the degree of vacuum necessary for the production of the X-ray.
- 1878 Sir William Crookes discovered that high voltage electric current, in its passage through a highly evacuated tube, was being carried by a stream of radiant particles, originating at the negative terminal. These were later called "cathode rays."
- 1888 Professor Heinrich Hertz succeeded in proving a mathematical proposition stated by Maxwell in 1866: that an electrical disturbance should develop waves in the ether. Lenard, a pupil of Hertz, demonstrated the effect of the cathode rays on crystals of barium platinocyanide and sensitive photographic plate.
- 1895 NOVEMBER 8. Roentgen's observation was made on a Friday evening, while he was working alone in his laboratory. When the room was darkened and the current turned on, Roentgen noted a fluorescence emitting from a barium platinocyanide screen on the wall some distance from the Crookes' Tube. While walking toward the screen, Roentgen crossed the path of the "rays" and noticed the shadow of his hand appearing on the coated side of the screen. The fluorescence on the screen was not of prime importance—"it was the fluorescence of the screen in the shadow which attracted Roentgen's attention, and his following up this first observation yielded the discovery of the X-ray."
- 1896 First demonstrated roentgenogram: weights in closed wooden box.
- JANUARY. Dr. Otto Walkhoff, a dentist of Braunschweig, Germany, made the first dental radiograph; exposure time was 25 minutes.
- FEBRUARY. The first X-ray picture of the teeth was exhibited by Professor Koenig to the Society of Physics at Frankfurt, Germany.
- APRIL. Dr. William James Morton, of New York, made the first dental radiograph in the United States, and was followed soon by Drs. Van Woert, Ottolengui, and C. Edmund Kells.
- JUNE. X-rays first mentioned in American dental literature. Kirk, Edward C.; Editorial (*Dental Cosmos*) and Morton, William J.; "X-ray and Its Application to Dentistry." (*Dental Cosmos*).
- AUGUST. Dr. C. Edmund Kells, of New Orleans, gave the first dental X-ray Clinic ever held in the United States, at Asheville, N. C. After a period of constant devotion to the development of radiodontia Dr. Kells died a martyr to the cause.
- Professor Jackson of Kings College, London, invented the first single-focus tube for X-ray work.
- 1896-1898 Caustic potash bulb used to regulate amount of current. Concave aluminum cathode used in some of the first tubes.
- 1896-1913 Period of transition in the design and manufacture of gas X-ray tubes, rectifiers, rotary converters and spark gaps, advancing from the Telsa transformer, high-frequency type of machine, and induction coil type to the more modern oil immersed transformer type which became more popular with the advent of the Coolidge Tube.
- 1897 JUNE. Dr. Van Woert was the first person in America to use a *film* intraorally.
- 1899 Ruhmkorff Coil built especially for Roentgen-ray work.
- Thomson and Tesla experimented with the high-frequency alternating current and found that with a very high oscillation the current would excite the single-focus tube and not produce the undesirable heating effects.
- Ramney-Wimshurt-Holtz Static Electric Machine: current source for excitation of Crookes' Tube.
- Double-focus vacuum tubes replaced the single-focus type to compensate for the change of current, i.e., D.C. to A.C.

(Continued on next page)

Chronology of the X-Ray

(Continued from preceding page)

- MAY 10. Dr. Kells made the first use of a diagnostic wire in root-canal therapy.
First automatic regulation tube.
Crookes' Tube with hollow platinum target devised. Platinum reflector added for use with heavy currents.
Platinum circular target first used on Crookes' Tube.
- 1907 Professor A. Cieszynski of Lwow, Poland, described an angle meter for measuring the chief ray in the perpendicular plane. (Described by Dr. Raper in 1924).
First rotary converter installed in Jefferson Hospital in Philadelphia.
- 1908 First application of ductile tungsten as a substitute for platinum in the target of the X-ray for controlling milliamperage of current by Dr. Coolidge of the General Electric Research Laboratory.
Original dental films packet produced by Eastman Company.
- 1910 Formal education in Radiodontics was given in eight Dental Schools.
One school had demonstrations by staff instructors.
- 1911 Dr. Howard Raper published the first series of articles on X-ray in *Dental Items of Interest*.
- 1912 Dr. Weston Price first suggested the use of a triple-coated film.
- 1913 First commercial handwrapped periapical dental X-ray film packet.
- 1913 Dr. W. D. Coolidge developed the hot-cathode X-ray tube, a new type of high-vacuum tube with a hot tungsten filament for the source of electrons.
Dr. Cieszynski published the first handbook on roentgenology, in which he outlined both the intra-oral and the extra-oral techniques. (Copy of book sent to Dr. Raper).
- 1915 Dr. Howard Raper wrote the first textbook on roentgenology, established the first full-time course in a dental college and coined the word "radiodontia."
- 1916 The Dental Education Council recommended 16 hours for Radiodontics. Mention was made of clinical as well as of theoretical study.
Piffard Tube and Automatic Regulator produced.
- 1917 Occlusal, or bite, film first made.
Development of the radiator-type of Coolidge Tube.
- 1918 Cossor Tube with automatic softening device and tin radiator for cooling anticathode.
Mueller Tube with water-cooled anticathode and automatic softening device.
Transformer Tube.
Siemens Bulb with massive anticathode and osmosis softening device.
Mueller Bulb with tong method of cooling anticathode.
Duplitized extra-oral 5x7 film produced to obtain greater speed and contrast.
- 1920 A machine-wrapped periapical film packet placed on the market.
Courses in Radiodontics given in forty schools. The remaining five schools did not offer any separate and distinct course.
General Electric Research Laboratory announced the development of a shockproof dental X-ray unit, in which both the hot-cathode tube and the high-voltage transformer were oil immersed in the same metal container.
- 1921 Machine-made packet introduced.
- 1924 Dr. Howard R. Raper originated the intra-oral method of radiographing both upper and lower teeth on a single bite-wing film, known today as the interproximal X-ray examination.
- 1925 Introduction of safety base of cellulose acetate for dental X-ray film and intra-oral periapical radiatized film packet.
- 1926 "Telephotograph," first Dental sciagraph, transmitted by wire from New York to Chicago.
- 1928 Dr. Clarence O. Simpson outlined the placement of X-ray packets in taking a full series.
- 1929 White film packets produced.
- 1930 Small periapical film for children, termed Number O, introduced.
- 1935 The Curriculum Survey Committee recommended thirty-four hours of instruction in Radiodontics.
- 1938 Rapid-processing periapical film manufactured.
- 1940 All dental schools required students to know procedures involved in taking radiographs, from which diagnostic interpretations must be made.
- 1941 Announcement of ultra-speed periapical dental film.
- 1945 Bite-wing film with radiatized emulsion introduced.
- 1946 Dr. George Karn outlined the precision placement of film packets, in detail, in taking a full series.

ADMINISTRATION

President

HARRY CLIFTON BYRD

PRESIDENT
OF THE
UNIVERSITY OF
MARYLAND

Governor

Hon. HERBERT R. O'CONNOR

GOVERNOR OF THE
STATE OF MARYLAND

The "Mill"

THE CLINIC

Nothing to Look at

EARLY one morning the dim outline of instrument cases could be seen as they lay in the shadows of the window panes. It was twilight still. The clinic was not much to look at . . . The first sign of life was the office staff headed for their daily toils . . . The rush for chairs . . . Phones ringing . . . Instructors blinking . . . A voice is heard, "Patients are waiting" . . . Hands wave . . . The noon bell rings . . . Some go to lunch . . . Hands clap . . . Twilight again . . . The clinic is sad . . . Empty chairs, deserted rows . . . Shadows and eerie sounds reign again . . . Nothing to look at—but something to remember.

Some Faculty

LEE EDWARD WARNER, *Prosthesis*

Reserved . . . legerdemain artist with plaster . . . sets teeth in four dimensions . . . the freshman's nemesis and the senior's deity . . . prefers Phillies . . . "That's fine. —Whoops! I dropped it.—Do a repair."

GARDNER P. H. FOLEY

Dental History and Dental Literature

Lively class sessions . . . gremlin of grammar . . . the Sage . . . philologist . . . reminiscer . . . editor of the *Journal* . . . faculty advisor of the *MIRROR*—its lifesaver . . . literature addict . . . anthologist of dental items . . . histrionics . . . track and baseball celebrities . . . "Come In-n-n-n-n!"

DORSEY ROBERT TIPTON, *Anesthesia*

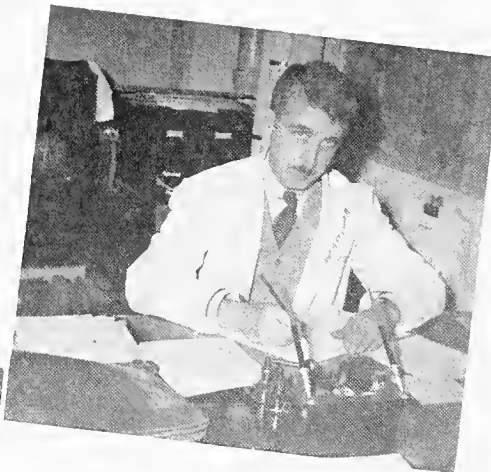

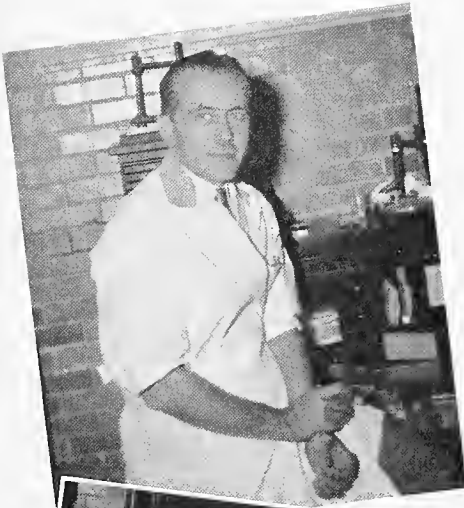

Conservative . . . spotless uniforms . . . caters to children . . . overflowing professional attitude . . . respects student opinion . . . his lab coats fit the boys . . . "Collect fifty cents and give him his instructions."

ROBERT H. OSTER, *Physiology*

Profound lecturer . . . synchronizes his lectures with the school clock . . . gives students benefit of the doubt . . . a true pedagogue . . . notebock analyst . . . "You forgot to mention the source of your write-up."

GEORGE MCLEAN, *Principles of Medicine*

Diagnostician par excellence . . . humorist . . . idealist . . . impeccable in appearance . . . eloquent lecturer . . . *itis* conscious . . . his course an inspiration . . . listed in *Who's Who* . . . photography and golf . . . "Heard a right good story t' other day."

Personalities

EDWARD C. DOBBS, *Pharmacology*

Progressive teacher . . . pleasant smile . . . hearty laugh . . . Psi O's best Zip . . . has students' problems at heart . . . biological approach to everything . . . botany his hobby . . . fishing expert . . . likes his midnight brew . . . ginger ale his pet peeve . . . "How can this course be improved?"

HUGH T. HICKS, *Periodontia*

Popular . . . professional mien . . . razor-edge crease . . . comprehensive exams . . . listens to all complaints . . . authority on Chinese and Draft Board stories.

E. C. VANDEN BOSCHIE, *Biochemistry*

Adept enunciator . . . students' nestor . . . unique marking system . . . applies first law of thermodynamics to his finals . . . connoisseur of fine teas . . . photographer and gardener . . . "I know, but *you* showed some doubt."

KARL F. GREMLER, *Operative Dentistry*

Thorough lecturer . . . practical operator . . . designer of the "Furbish-scratcher" . . . derivation of students' surnames a pastime . . . challenges interpretations on G. V. Black . . . has spare dental unit in cloak room reserved for Juniors . . . "You start condensing in the deepest-most part."

GEORGE COFFMAN BLEVINS, *Anatomy*

Erudite . . . keen diagnostician . . . altruist . . . modest . . . reads X-rays like a book . . . his dissections all but function . . . lectures sans notes, and accurately . . . "That's right."

The Village Toothsmith

(BY LONGBELLOW)

“DENTAL surgery had made enormous advances since his boyhood, when, he remembered, the following announcement appeared over the entrance to a blacksmith’s forge which he once visited. ‘Tooth-drawing, bleeding, and cupping done here.’ The instrument used was called a pelican, and had a strong, sharp, hooked beak.” Mr. J. W. Hulke, F.R.S., at the Dental Hospital Dinner.

Under the spreading gum-tree’s shade
The village smithy stands,
The smith a busy man is he.
For when frail flesh demands,
He cups and bleeds and pulls out teeth
With his large and sinewy hands.

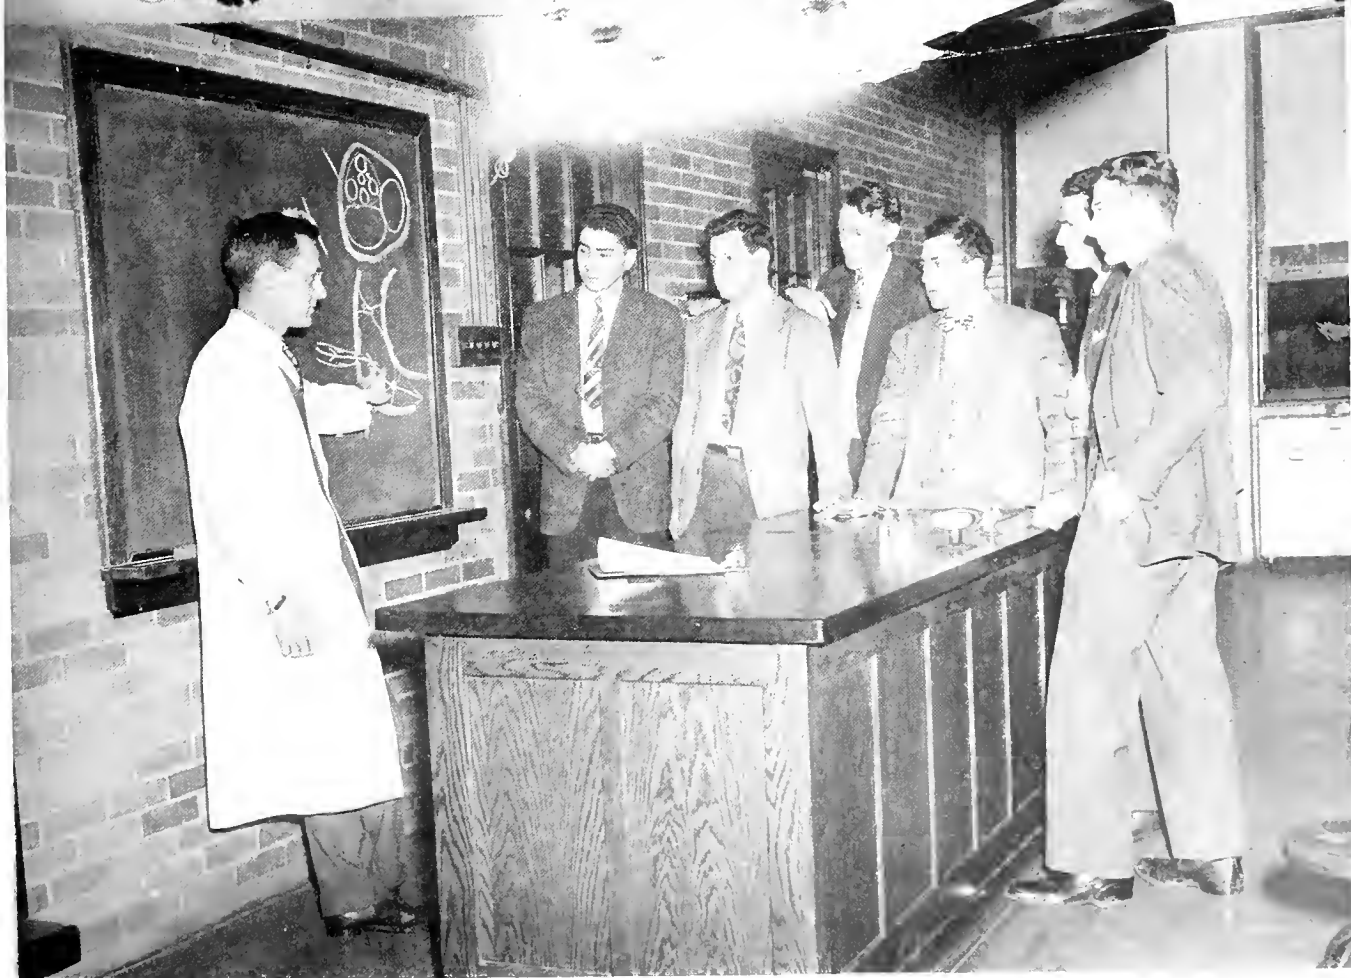

Week in, week out, from morn to night
You may see his clients there,
Bound hand and foot to the anvil—
For he owns not any chair—
Squealing, squirming, as he swings
The pelican in air.

Its beak is sharp and hooked and strong
To stir the stumps of man;
You shall not see so weird a thing
From Crewe to Matapan;
They look the whole world in the mouth,
He and his pelican.

The children coming home from school
Look in at the smithy door;
They love to see the pelican
And hear the patients roar,
And catch the double teeth that fall
Like hailstones on the floor.

The poem is taken from E. V. Lucas’ splendid autobiographical work Reading, Writing and Remembering (1932).

CLASSES

SENIOR CLASS OFFICERS

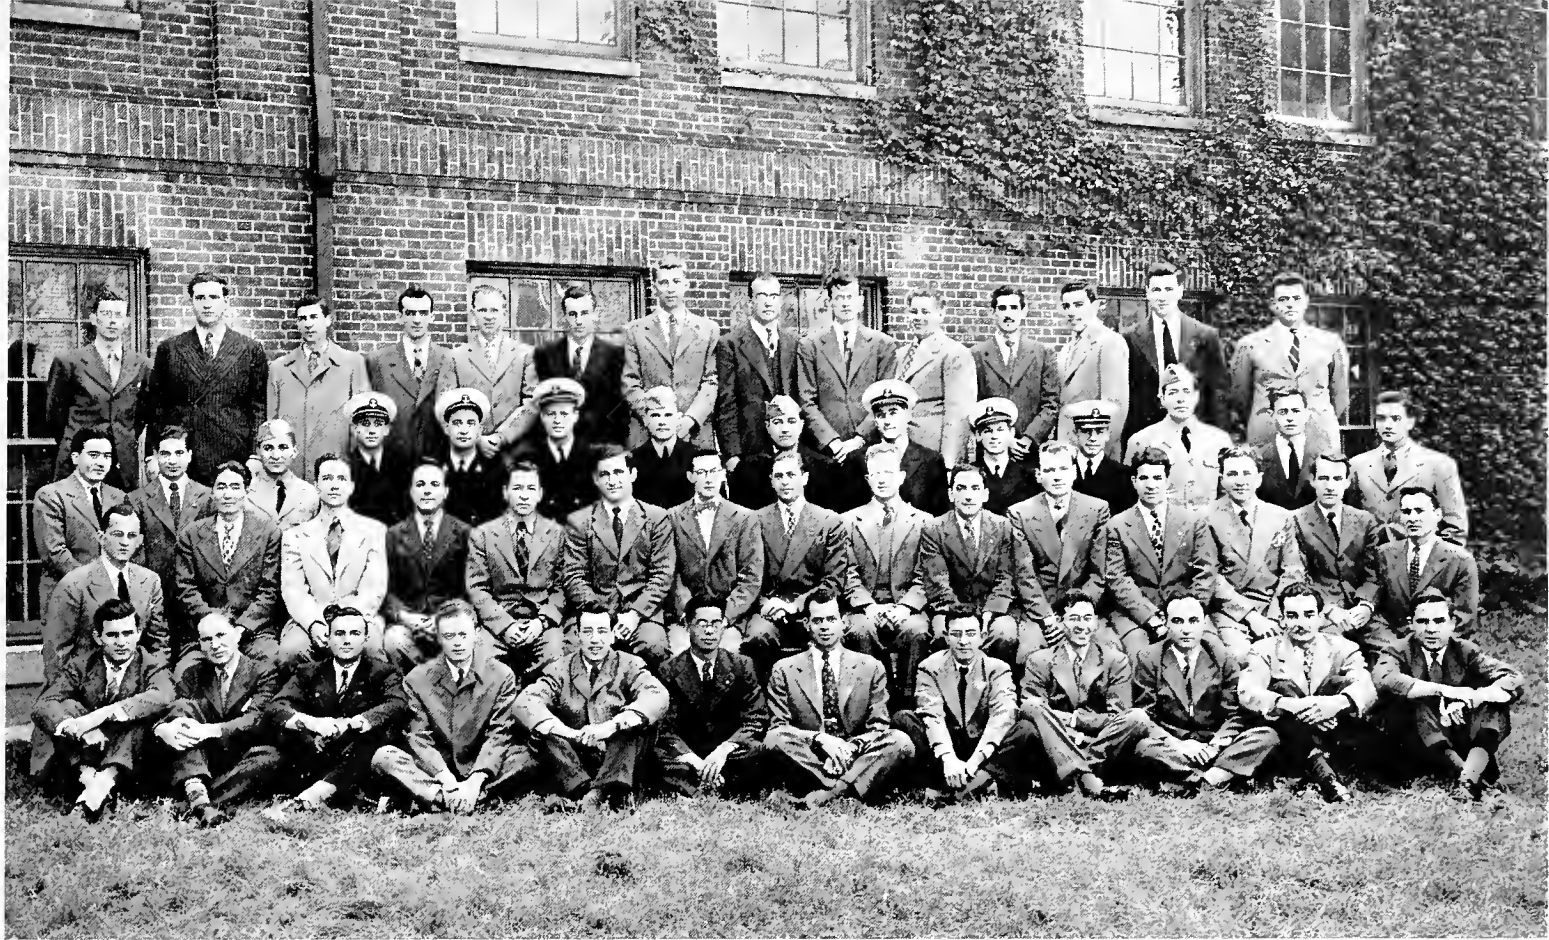

<i>President</i>	JOSEPH P. SAN CLEMENTE
<i>Vice-President</i>	EUGENE M. NELSON
<i>Secretary</i>	HENRY S. KANIA
<i>Treasurer</i>	MURRAY H. CASPER
<i>Sergeant-at-Arms</i>	LEONARD NARDOZZA
<i>Historian</i>	FREDERICK WEINSTEIN
<i>Student Representative</i>	FRANK V. TIROCCHI

The Seniors

FINIS OPUS CORONAT. The vigil of graduation is most expecting. The mind of the senior, hoping and reminiscing, dwells ponderously over the numerous events which have led him to his present state of meditation.

It's an overflowing cornucopia of memories, palpitating moments of anxiety, depressing feelings of doom and defeat, unstinted marks of struggle and labor, weary steps on a hard-trodden path, new plans and reconversions, beatific visions of victory and success, the heart-choking sensations and thrills of a day not too far away, the momentous hand-over of the sheepskin, the thunderous oration, the praise . . .

The tremulous fingers of his carving days, the din of tin cans, the trying demonstrations of rubber dam, the vast collections of un-remunerative prophys, the dry fields for inlay cementation, the spectre of Class III foil preparations, the exhausted supply of cotton rolls, the use of the "Automaton," the unending accumulation of points which never totals a thousand . . . all these things unfold themselves to him as he delves into the short span of his student days.

First Row: A. Lopez, H. Moses, C. Bove, M. Colecchi, W. Krumbeck, J. Baido, H. Rothchild, M. Ackerman, G. Lebau, G. Towlen, J. Diliberto, A. Garvey.
Second Row: G. McLean, F. Sugiyama, J. Garvey, C. Calenda, N. Toussaint, L. Nardozza, E. Nelson, J. San Clemente, F. Weinstein, R. George, R. Zak, F. Tirocchi, A. Damiani, R. Murphy, C. Sheetz.
Third Row: M. Morelli, J. Cappuccio, H. Zaytoun, M. Casper, A. Demyan, M. Jurkiewicz, B. Delorme, J. Heck, F. Kiernan, H. Nachlas, M. Pires, C. Moore, J. Newman, F. Naples.
Fourth Row: N. Paquin, M. Mackler, T. McSparren, B. Pollack, F. Petuskis, E. Moes, G. Hansen, G. Calderon, B. Scidmore, H. Kania, L. Hernandez, R. Bonvini, A. Liftig, F. Maxson.

Now he pauses to scan the future over and beyond the horizon of time. Will he strut about firm and decisive, competent and responsible, helpful and humane, or will he prove to be dubious and inconsistent, inept and unassuring, transgressive and harmful?

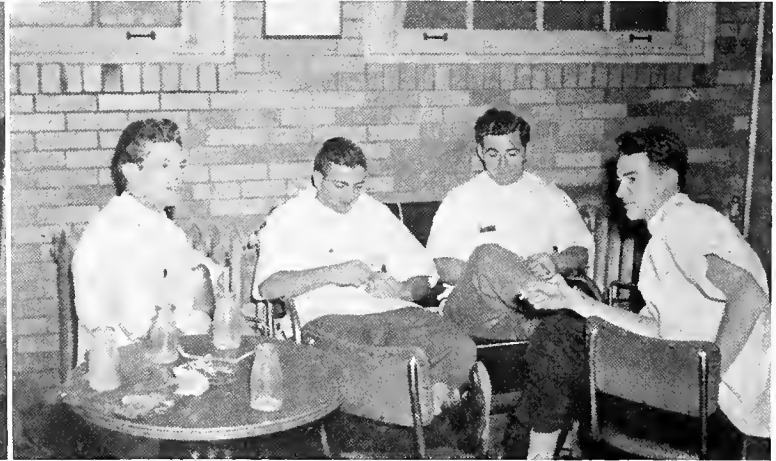

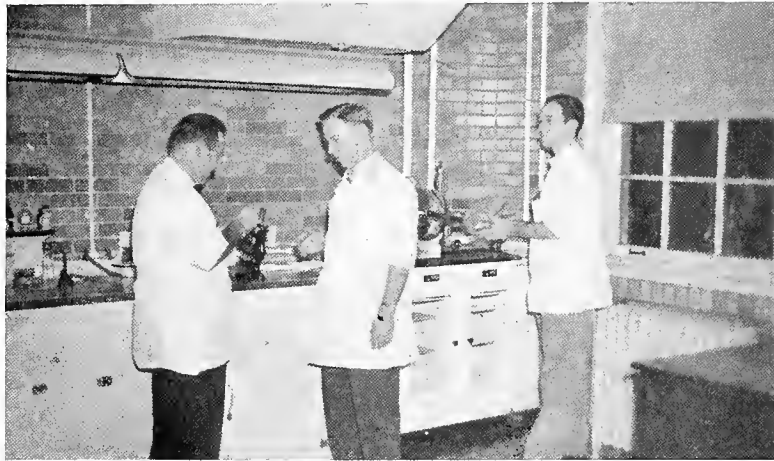

He belongs to a profession that is honored. Already in our land we have those that have sprung from the loins of this venerable school, upon whose names rest glory and immortality. Their towering figures loom resplendent (in his eyes), twined together like a cord by their conceptions, inspirations, skill and endurance, ready to share their inexhaustible pools of courage, sagacity and experience.

He will take heed and emulate!

Honorary Class President
 FELIX TROMMER, D. D. S.

The Juniors

As we entered the junior year, we turned a corner which presented an avenue far different from that on which we had been traveling. Sport coats, slacks, and fancy tweeds were a far cry from the monotonous khaki and sun tans which had been discarded just a few days before at Fort Meade. Everyone assumed a professional mien. Even that long wait for our first patient, as everyone complained that "He has already had two assigned and I haven't had any," failed to dim our enthusiasm. Even after our first prophylaxis, when the instructor remarked, "Now, doctor, go back and CLEAN his teeth!" we failed to take the usual dose of clinic gas. However, when Dr. Randolph said, "That's okay, BUT—sharpen that disto-buccal-mesio-lingual-pulpal angle just a wee bit," and everyone began to complain about more clinic time and less points, the instructors looked sadistically at each other, rubbed their palms, and whispered, "We'll get 'em like the rest!" Their anticipation was soon realized when Ascioffa set the pace by discovering caries in a full upper plate. Even lecture halls were not safe for much-needed naps as Dr. Wilkerson bellowed forth with "Run that thing slower, BOY!" Eventually everyone settled down to his normal pace. Ye honorable

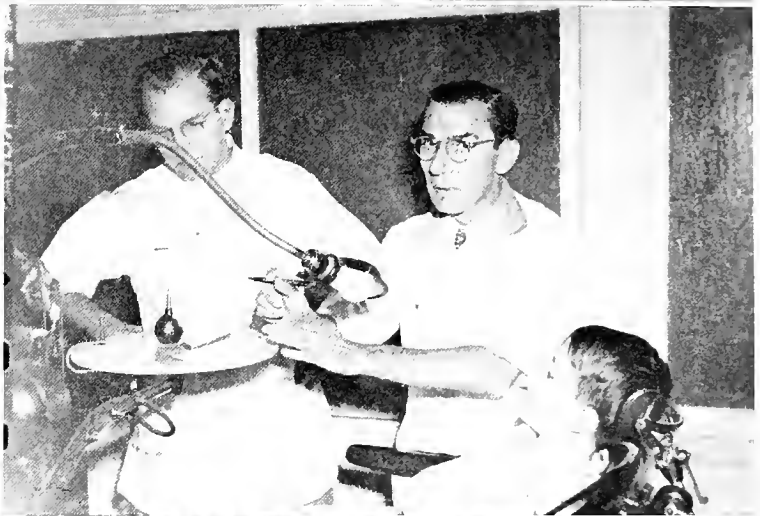

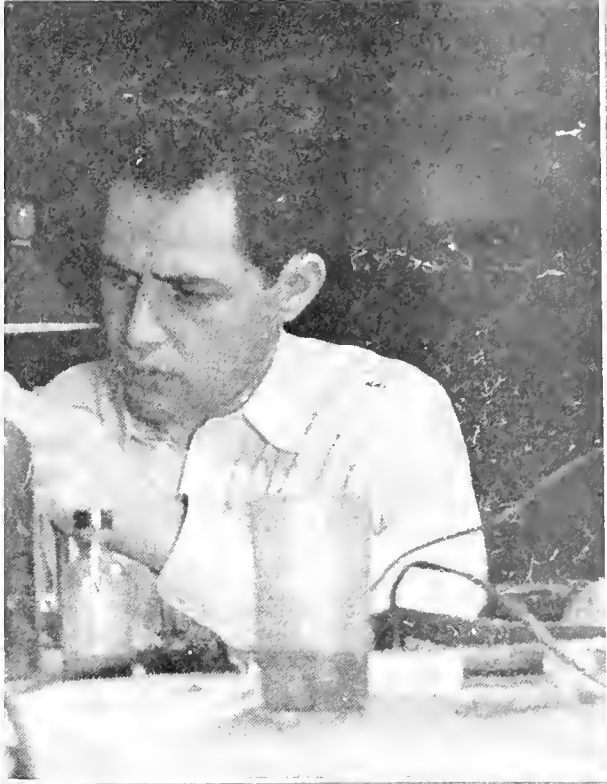

First Row: A. Lombardi, M. Soltys, R. Eschenburg, J. Binderman, T. Clark, J. Belott, R. Flinchbaugh, J. Hughes, J. Baldacchino, S. Gottlieb, J. Langley, W. Seifert.
Second Row: E. Eckerd, W. Talbott, W. Hartsock, R. Dorobiala, F. McCall, R. Alvarez, N. Hannan, A. Kronthal, J. Traylor, J. Bell, A. Schaeffer, M. Fagan, W. Cook, L. Rapoport, S. Johnston, R. Chouinard.
Third Row: C. Mollis P. Bingham, S. Kotula, G. Heroux, P. Lambert, D. Cray, B. deHosson, R. Grier, W. D'Abbraccio, W. Roth, N. Bookstaver, S. Londeree, M. Stamp, L. Nathans, C. Olive, R. Lamb, W. Smith, E. Vanden Bosche.
Fourth Row: C. Isaacson, T. Sikes, J. Ballouz, W. Coleman, E. Steinhof, J. Vila-Santana, G. Clark, H. Yerger, J. Gill, C. Beck, R. Hepler, R. Nielsen, J. Hohing, R. Posner, J. Attanasio, R. Mohn, E. Gramse.

Senior, assigned to surgery, ordered: "Hey, Junior, wash my hands!" "Hair" Hepler spoke of his love for Crown and Bridge; Ollie never failed to ask a question; Talbott ran Posner a close second as the most-misunderstood-man-in-class; Schaeffer twiddled that curl "while foil burned;" and Alvarez began to speak with that hill-billy accent. In some mysterious way, points began to pile up and, suddenly, in February, as the term ended, the Navy "Gravy-train" was scuttled and Roth decided to remain a bachelor for just a "wee-bit" longer.

<i>Historian</i>	WALTER DAVIS

The Sophomores

At the beginning of our freshman year we had thirty-five months ahead of us before graduation. But now at the end of our sophomore year we have only 27 months to go. With all that time on our hands the class can amass the points and drive forward to scholastic superiority.

Bill Leakey can now use the first speed on the rheostat; Bobenko will have more time for a box preparation; Walt Davis can devote some leisure time to his many athletic capabilities; Page will be able to take more of his fine photographs; and Reichel will continue to display his wit with added effort.

Until we start to face that "prosaic thing known as the clinic" we'll spend our lunch hours in the lounge in a desperate effort to learn

<i>Secretary</i>	PEDRO HERNANDEZ
<i>Treasurer</i>	WILLIAM YEAGER, JR.
<i>Sergeant-at-Arms</i>	WILLIAM MUHLBAUER
<i>Historian</i>	SIDNEY HERMAN

The Freshmen

Twenty-five rookies from many walks of life entered B. C. D. S. on October 2, 1945, totally uninitiated in the ways of dentistry. Intent on earning a D.D.S. degree, the class of 1949 was formed.

A truly unique class in the annals of the school! Although admitted during the accelerated period, we are the first class to return to the regular four-year program. The group also includes the last students to be enrolled under the V-12 Navy program of World War II. This also is the year the Army discharged Dr. McCrea for the purpose of resuming his teaching of Histology. Boy, did the Army make him tough. This class, furthermore, had the distinction of initiating the trimester system of teaching.

First Row: P. Hernandez, L. Franz, S. Herman, B. Fox, V. Diefenbach, E. Chircus, C. Lynn.

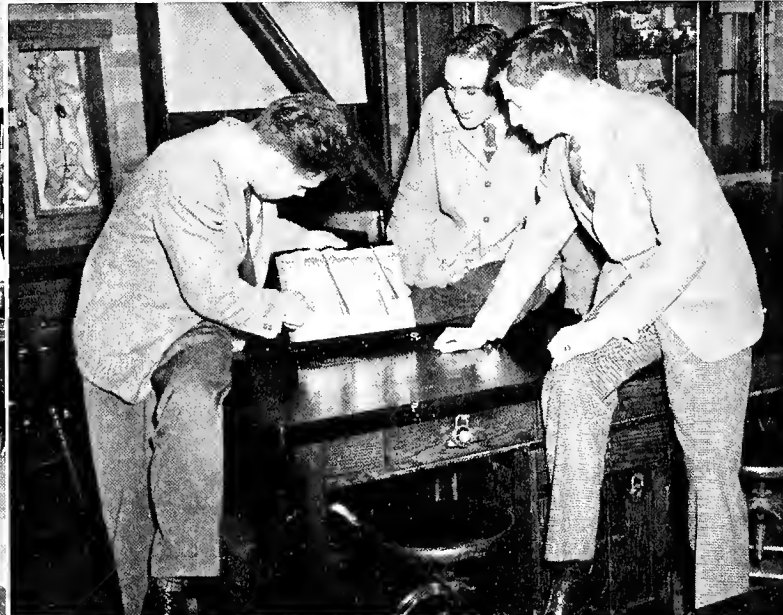

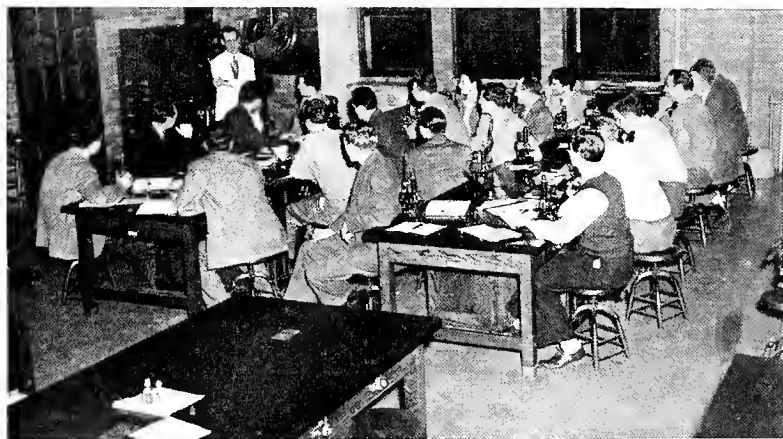

Second Row: R. Simmons, D. Guerdan, J. Parent, M. Peel, E. Kolberg, W. Muhlbauer, F. Corzine, D. LeBreton, N. Bloch, T. Leizman.

Third Row: E. Kostas, C. Milne, M. Burgin, J. Callahan, W. Yeager, G. Spiegel, A. Picozzi, G. O'Roark.

The students hail from many states: Arizona, California, Vermont, West Virginia, New Jersey, New York, Maryland, Massachusetts, Connecticut, the District of Columbia, and Puerto Rico. Alphabetically, the roll runs from B to Y; no A's.

The usual "gas" was absorbed from the upper-classmen. Resolved are we, however, that the class of 1950 shall not pass on this mis-information.

H. S. ZAYTOUN

Treasurer

In February, 1941, several students felt the need for a study group at the B. C. D. S. to discuss subjects related to Dentistry. The idea was presented to Drs. Robinson, McCrea and Hahn, who approved wholeheartedly. An announcement about the organization, stating its purpose, was made and a meeting called. It was decided to call the organization The O. H. Gaver Dental Seminar in memory of Dr. Oren H. Gaver, who had recently passed away.

The organization has been continued for the past four years, and it is the hope of the present members that it will continue on far into the future, not only as a memorial to Dr. Gaver, but as a stimulus for further study and research by the students.

First Row: M. Pires, G. McLean, E. Steinhof, H. Zaytoun, C. Sheetz, R. Flinchbaugh, R. Zak, F. Sugiyama, H. Nachlas.
Second Row: C. Bove, W. Cook, J. Diliberto, A. Lopez, J. Hohing, S. Londeree, M. Stamp, H. Mackler, T. Sikes, M. Casper.
Third Row: G. Heroux, L. Greene, F. McCall, H. Kania, G. Clark, C. Moore, H. Rothchild, J. Traylor, C. Isaacson, C. Olive, W. Talbott, E. Vanden Bosche.

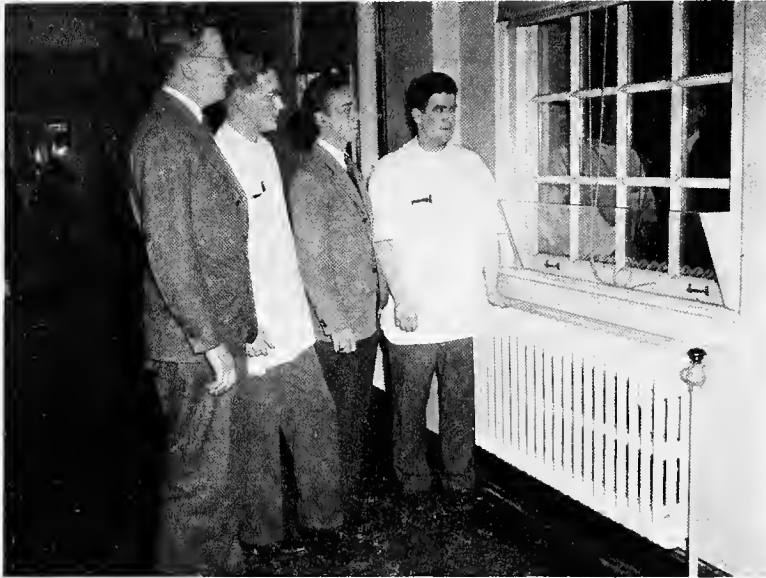

Dr. Gaver was born on May 18, 1892, in Dyerville, Maryland. After attending county public schools, he studied a business course at Columbia College, in Hagerstown, Maryland. He then became employed in a bank in Thomas, West Virginia. Soon afterwards, he entered the School of Dentistry of the University of Maryland, from which he was graduated in 1918. He received the University Gold Medal for the highest scholastic rating in his class. He continued to study physiology and bio-chemistry at the Johns Hopkins University and at the School of Medicine, University of Maryland. In the summer of 1918, he was appointed Instructor of Clinical Operative Dentistry in the Dental School. In subsequent years Dr. Gaver held the positions of Superintendent of the Dental Clinics and of Professor of Physiology. At the time of his death he also taught Physiological Chemistry and Dental Materials.

Dr. Gaver was a Fellow of the American College of Dentists. He was an active member of Psi Omega Fraternity, Omicron Kappa Upsilon Fraternity and the Gorgas Odontological Society; he was a past president of the Maryland State Dental Association.

Since its organization several years ago, the Student Activity Council has been active in promoting better understanding between the faculty and the students.

The Council is concerned with matters pertaining to material improvement in and about the dental school which will serve to alleviate any conditions that tend to be detrimental to the student's well-being or working environment.

During the meetings the student members of each class present the specific problems of their group. Those matters are discussed with an eye towards the betterment of the situation.

The Council also has a hand in social affairs. Each year the Council sponsors the Mixer Dance, and the student body continues to regard the get-together as *the* top-notch affair of the year.

Among the numerous remaining activities to which impetus has been given by the beneficent cooperation of this Council we deem worthy of consideration the aid extended to Gorgas and Omicron Kappa Upsilon.

Interfraternity Council

OFFICERS

<i>President</i>	CHARLES F. MOORE
<i>Secretary</i>	MURRAY H. CASPER
<i>Treasurer</i>	BURTON R. POLLACK

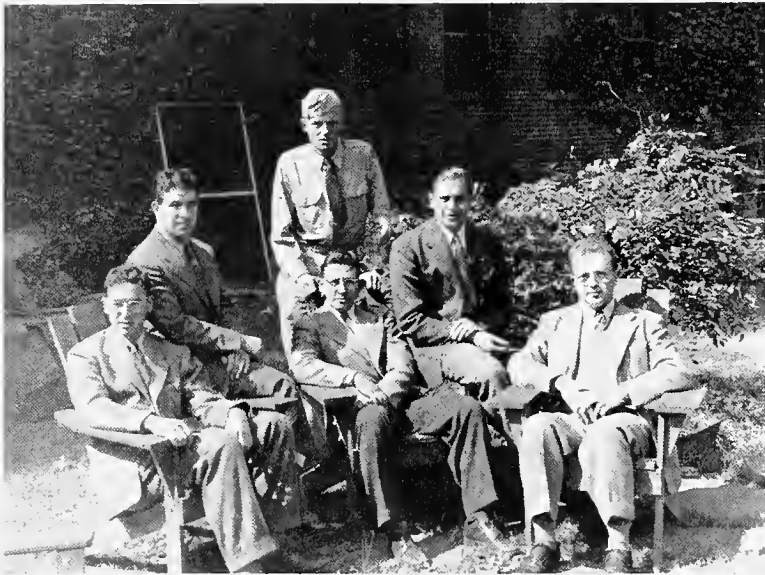

The Interfraternity Council is composed of two active members, one inactive member, and one fraternity advisor, from each of the four fraternities. During the past two years the Council has been instrumental in solving the many interfraternity problems that have arisen.

Rules and regulations concerning rushing must be abided by and the spirit of competition for new members is given added impetus and encouragement. Each year the Council sponsors athletic events for the member fraternities and awards a Gold Cup to the winners.

The Council is prominent in the social affairs of the School. The Interfraternity Dance sponsored by the Council is a popular affair among the social events of the year.

Gorgas Odontological Society

OFFICERS

<i>President</i>	M. J. JURKIEWICZ
<i>Vice-President</i>	E. M. NELSON
<i>Secretary</i>	F. V. TIROCCHI
<i>Treasurer</i>	F. WEINSTEIN
<i>Historian</i>	M. ACKERMAN
<i>Sergeant-at-Arms</i>	J. P. SAN CLEMENTE

The Gorgas Odontological Society was founded in 1916 in honor of Dr. Ferdinand J. S. Gorgas, a great contributor to dental literature and to dental education, former dean of the B.C.D.S. and the first dean of the University's School of Dentistry. Members of the Society are selected on the basis of scholastic aptitude and professional integrity.

A meeting of the Society was held in October, 1945, to discuss the present revision of the Constitution. This revision has enabled the members to place the organization on a more workable basis and to make it more compatible with the newly adopted trimester system.

The standards of Gorgas were raised to afford a better selection of students and still maintain the fraternal characteristics of the Society. It is hoped that the student body will regard membership in the Society as an achievement worthy of high recognition.

Two meetings were held during the school year, the first to discuss the revision of the constitution and the second to set the organization meetings at specific intervals to allow for speakers and discussions on dental subjects.

The annual Gorgas dance was held in the Crystal Ballroom of the Emerson on January 26. The senior members were presented with certificates of membership.

First Row: F. Weinstein, G. Lebau, M. Jurkiewicz, F. Tirocchi, M. Ackerman, J. San Clemente.
Second Row: F. Sugiyama, G. McLean, B. Pollack, H. Rothchild, R. Zak, L. Towlen, C. Bove.
Third Row: F. Petuskis, J. Heck, C. Sheetz, J. Diliberto.

Famous practitioner, energetic teacher, noted writer, Ferdinand J. S. Gorgas was born in Winchester, Va., on July 27, 1834, the son of John De Lancy and Mary Ann Gorgas. He received his early education in the public schools of Carlisle, Pa., and attended the Dickinson grammar school and the Dickinson College, from which he received the A.B. and A.M. degrees. Dr. Gorgas entered the Baltimore College of Dental Surgery in 1854. After receiving the degree of D.D.S. in 1855 he began the practice of dentistry in Madison, Indiana, and later practiced in Harrisburg, Pa. Desirous of broadening his already remarkable knowledge, he began the study of medicine in the Medical Department of the University of Maryland, receiving the degree of M.D. in 1863. In 1865, he became dean of the Baltimore College of Dental Surgery, which office he held until 1882. From 1882 to 1911, he served the Dental Department of the University of Maryland as dean and as Professor of Prosthetic Dentistry, Oral Surgery, and Dental Medicine.

He died in Baltimore on April 8, 1914.

DR. FERDINAND J. S. GORGAS
 A.B., A.M., D.D.S., M.D.

Library

The history of the growth and development of the Dental School Library is analogous with the progress of dental education in the past two decades. The first books that were to comprise the Library were donated by members of the profession.

In 1924 Dean Robinson, cognizant of the need and importance of a well-equipped library, set forth an expansion policy which was supported effectively by the establishment of the Clarence J. Grieves Foundation sponsored by the Maryland State Dental Association.

The Library has grown to one of the most modern of its kind in the country. There are about 12,000 books, periodicals, pamphlets, etc., on its shelves at the present time. Besides the valuable early works there are modern books covering every phase of dentistry. Over 160 journals are regularly received by the Library.

FRANCIS SUGIYAMA

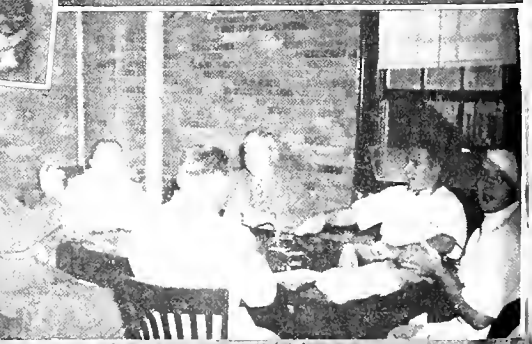

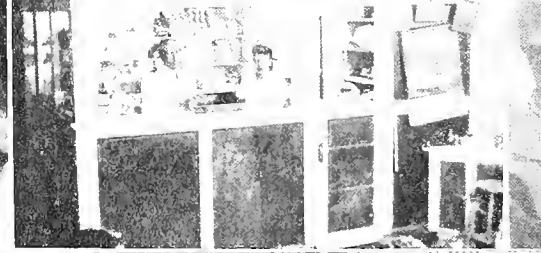

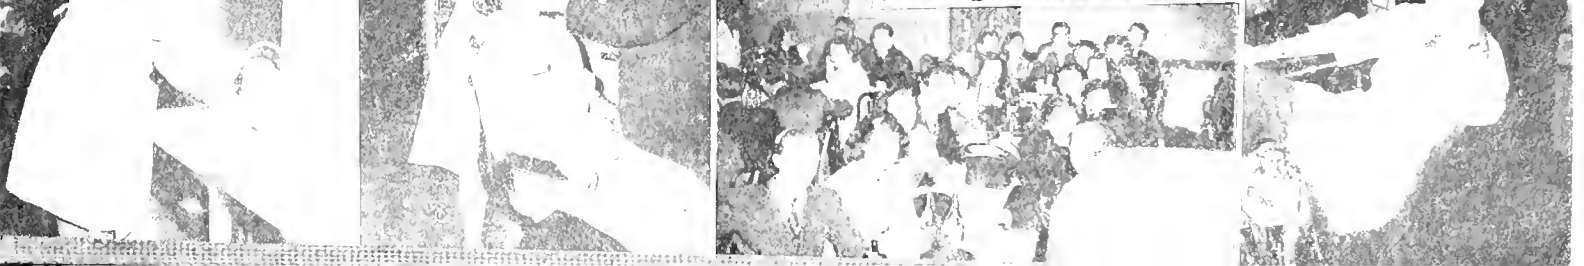

Typical Topics

- DEMYAN: I have the points but they're not checked off.
- DAMIANI: Al George, your chair is being taken by a Junior.
- A. J. GARVEY: Who's section you in? . . . Yep, that's a cavity.
- JIM NEWMAN: I'm learnin' today, Doctor!
- SAN CLEMENTE: That's a foolish concept.
- POLLACK: I'm sorry I asked the question, but I got references.
- CALENDA: Oh Jack! Stop, please, Can'tha be nice?
- HANSEN: I'd like to see you give that exam to . . .
- PETERSON: No, Bruce.
- MOES: He's really sincere about his lectures, he says . . .
- ANONYMOUS: Hello! Dis is da guy dat's woikin' on ya down at da clinic.
- MORELLI: Pax.
- NEUMANN: Monarch of all he surveys.
- SHEETZ: I know she can do it by three lengths.
- MAXSON: Do you want the crying towel?
- PIRES: Honest, I'm gassed.
- NACHLAS: Don't push my four inlays past the middle of the oven.
- NELSON: I make a motion that we go formal.
- KRUMBECK: Sweet Sue, It's You.
- SUGIYAMA: What did you make in the exam?
- MOORE: Can I borrow a cotton roll for a minute?
- MOSES: I like to argue with that man because I understand him.
- BAIDO: Whatzat?
- ROTHCHILD: That's news to me.
- KIERNAN: Oh Joy, Oh Rapture!
- J. P. GARVEY: What's the password for the day?
- LEBAU: Why can't I do that if I want to?
- BONVINI: I mean, for instance . . .
- BOVE: How did you like that for a patient?
- ZAK: Where you gonna eat, Al?

Deserved Dispensations

ACKERMAN:	A readymade full-cast crown.
DR. WILLIAMSON:	Students' gratitude for his exactness . . . in technic.
CAPPUCCIO:	A three-cornered hat and a silver podium.
DR. ESKOW:	Specimen prophy.
DAMIANI:	A real live male patient . . . from NORFOLK.
DR. KARN:	A soft-toed shoe.
DEMYAN:	More ballast.
DR. GREMPER:	Action on his interpretation of Black.
GEORGE:	Dr. Dosh's left-handed Beal's packer.
DR. KRESS:	A Hollywood contract.
HECK:	Paul Whiteman's diet.
DR. LEONARD:	A box of Carter's Little Liver Pills.
JURKIEWICZ:	Time.
DR. BIDDIX:	Roller skates.
MOSES:	An autographed copy of the Wagner-Murray-Dingell Bill.
DR. NUTTALL:	Orchids.
PAQUIN:	A Hamilton watch.
DR. DOSH:	A visible compensating plane.
PETUSKIS:	A sandpaper appointment book.
DR. ANDERSON:	A chance to talk to mother.
SAN CLEMENTE:	A bugle with a zipper.
DR. BRYANT:	An early lunch hour.
SHEETZ:	Calumet Farm with Twilight Tear.
DR. IDE:	Invitation to Mr. Anthony's program.
TIROCCHI:	A "hot quarter."
MR. FOLEY:	Credit.
TOUSSAINT:	A winning daily double ticket.
DR. SCHERR:	The best of everything.
ZAYTOUN:	A trip to Southern New England.
DR. EGGNATZ:	A governor on his digits.

FRANCIS
BUGIYAMA

CUSPID'S LAST STAND

Faculty Round Table

But don't you see there's more to that lesion than the eye can see? Isn't there? You-you, etc. You, Mac.

True, true. That question was not indicative of your knowledge and it's too bad that thirty-three boys thought the way you did—confusing isn't it?

Come In-n-n-n . . . Oh! it's you . . . You may speak now.

Lady, you're in a belluva fix, but we'll do the best we can for you.

Be sure your sin will find you out.

Watch the pulp, boy; watch the pulp.

Some practice you got there.

Yes, yes, now let's start all over again.

No Clinic Monday, Tuesday or Wednesday—But . . .

Don't worry, I only mark the good preparations.

The time switch is like Coney Island in the summer.

Shake mab band, I've out-Randolphed Randolph.

Putter, patch, procrastinate, pull . . . plates.

The bite is off, so adjust it by taking all the teeth out.

I gave the man a complete physical and two days later he was found dead! . . . He fell out of a third-story window.

The Reception Committee

THE NEWCOMER

Calls you by your first name—gives you confidence—listens to what you have to say about the preparation—amazes the boys, who visualize a revolution in treatment of students. They sing his praises in the lounge.

THE GREETER

“Is this your first preparation?” “Don’t worry about it.” “Do it as you did in Technic.” Slaps you on the back and checks the cavity. Speaks confidentially about the patient’s oral hygiene. Praises your work, with an accent, and gives you one under maximum.

THE ROCK

He’s nerveless. He’s the iron man. Fails to realize that each student has his limitations. Exercises your biceps. Neither fears nor favors anyone. Has his heart and soul in his work. Is satisfied if he teaches you, even if it’s at your expense. Disagrees . . . unless you agree.

BLUE RIBBON GENTLEMAN

Weeps no tears. Never disagrees, but corrects your interpretations. He’s proud of his crew, proud to know them, anxious to be of any help. Talks about everyone’s good points. When things go wrong he understands a good motive. Maintains that professional mark.

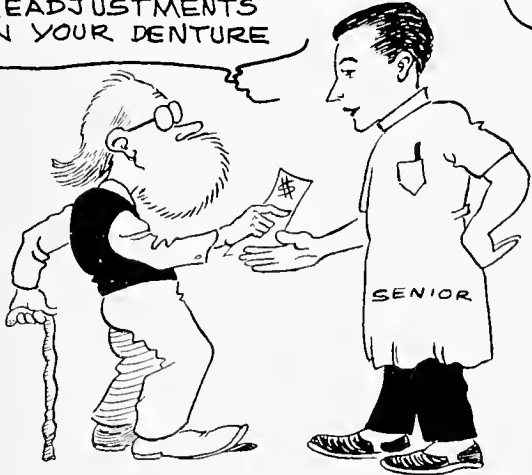

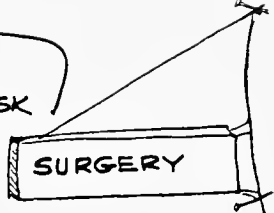

THE PATRIOT

He’s always giving some student a break . . . or a patient he can foil. Lets you in on all the secret discussions. Can find a reason for everything he does. Stresses quality if quantity is present. Prolific speaker.

When You're Ready to Do This

Where shall I locate? What do I need? What about financing? You know all the questions by heart. But no text-book has ever been written to tell you the answers — because every year, for every man, the answers are different.

We believe that it's our responsibility to you to know these answers. We keep up-to-the-minute records of all conceivable statistical data of every possible location for a dental office in our territory.

We know what you'll need for equipment — we'll guide you in your selection for the maximum operating efficiency.

Your proudest moment perhaps, will be the day you hang up your "shingle" . . . announcing to the community which you are about to serve that you possess all of the qualifications to practice dentistry according to the requirements set forth by your school and by law.

The measure of success you will enjoy will depend upon many things . . . personality . . . ability . . . integrity . . . and last but not least, your spirit of progressiveness which will be reflected by the environment of your office. And it is here that Weber will prove of inestimable value and help to you—not only through its many "Practice Building" services which are furnished gratis to you as a user of Weber Equipment but as a source of *new* and *better* appliances which are designed to make your work more efficient, more enjoyable, more profitable.

Ask your Weber Dealer how you can qualify for this complete course in "Dental Counselling and Office Management" or write us direct.

What Do You Do When Precision Attachments Are Indicated ?

More and more dentists are today prescribing precision attachment bridges and partial dentures. The reason is that better practice definitely indicates attachments for many cases of removable restorations.

What do you do under such conditions?

While many good laboratories offer excellent precision attachment service, some dentists do this work themselves or have their own technicians do it.

If you would like to see examples of **where** Better Practice Indicates Precision Attachments,

WRITE for our 12 Design Charts of Attachment Cases and Complete Descriptive and Technical Literature. They're FREE.

AND if you, or your technician, would like to master the technic of constructing precision attachment work before you recommend precision attachment restorations to any of your patients

ORDER COLUMBIA

PRECISION ATTACHMENT OUTFIT

It contains everything needed to test and perfect your skill at precision attachment work. This outfit (Cat. No. 335) includes:

1 COLUMBIA PARALLEL-OR; 2 Brown Technic Metal Proximal Contact Attachments; 2 paralleling mandrels; Articulated half-jaw Ivorine Dentoform with prepared abutments; Complete detailed and illustrated technic sheet.

Special Offer—all for \$27.00

This outfit enables you to perfect your skill by making a precision bridge on an articulated Ivorine model which, with the finished bridge, can be used to demonstrate precision attachment work to patients.

When Attachments Are Indicated, Use or Specify **BROWN PROXIMAL CONTACT ATTACHMENTS**

6 Outstanding Features of Brown Attachments Are:

- 1—Built-in Proximal Contact. Also made in Plain Shank Type.
- 2—Ten standardized, interchangeable sizes.
- 3—Strong—Made in one piece, no seams or solder.
- 4—Springy, positive retention.
- 5—Simple to adjust. Use any sharp instrument.
- 6—Closed bottom in male section makes insertion and removal of restoration easy for the patient.

As makers of attachments, we are as anxious to discourage their use where contra-indicated as to encourage it where indicated.

Hail and Farewell

At the end of the day the artisan shelves his tools and heaves a sigh of satisfaction. The limner blends the landscape with the firmament and stands back to admire. Their work is well done; their perseverance is worthy of praise. Utility is exemplified on the one hand; art is predominant on the other. Their task is often finished, but never ended.

The dentist lays aside his instruments—and pauses. His artistic endeavors have not been in vain, for his esthetic sense and his dexterity have enabled him to achieve highly professional results. His has been a task of both utility and art. And wherever he goes he will always find another human being who needs his help. His task is often finished, but never ended.

The pause in his work is his true reward—for it brings to him an inner satisfaction, a peace of mind. And now that the pause confronts us, we, the MIRROR staff of 1946, sincerely say to all those who have made this hiatus possible: Well done the job, well cleared the obstacles, too soon ended. Thanks again, Mr. Foley. Not a tear, but the bright morning dew—the *mirror* of another dawn.

JOSEPH F. DILIBERTO
